

## Intuit Master Builder for Electrical

How many hours each day do you spend handling the fine details of parts, materials, and labor rates—estimating, purchasing, and managing labor? Whether you perform service work, new construction, or both, Intuit® Master Builder™ software automates the business side of electrical contracting, taking these tedious but important chores off your shoulders.

For example, at a glance you can see all the parts and materials you've used during a project, as well as those on back order. And you can easily monitor labor productivity and compare budget-to-actual expenses. With service and inventory integrated with accounting and other management functions, think of the hours you'll save and the efficiency you'll gain.

## Take Command of Your Business as Never Before

Intuit Master Builder puts you in command by organizing your business processes into four easy steps—estimating, production, accounting, and analysis—that streamline and integrate construction management workflow. Its assembly-based estimating features, construction-compliant accounting engine, rich production resources, and leading-edge analysis tools can help you:

- Win more profitable bids.
- Finish jobs faster and minimize risks.
- Better manage your money and collect it more quickly.
- Make each new job more profitable than the last.

Now: enjoy your success.

## The Best Power Tool You Can Buy

Designed exclusively for construction, Intuit Master Builder combines industry best practices with trade-specific functions in a single, all-inclusive integrated system. For efficiency and accuracy, you enter information only once. Plus, you can personalize Master Builder for the way you work and extend your solution with add-on modules and custom applications to meet your unique management needs.

For larger companies, Intuit® Master Builder™ Enterprise offers increased performance, tailored access to data, and powerful remote-access capabilities that connect local-area networks (LANs), satellite offices, and job sites to its fast, protected, and reliable Web-enabled database. The Enterprise edition contains the same comprehensive feature set as Intuit Master Builder .

## Uncompromising Service to Help You Succeed

Intuit Master Builder is delivered with uncompromising service before, during, and after your purchase—to help you get up and running quickly and grow your business profitably. You'll benefit from easy access to:

- Online classes
- Live seminars
- Excellent technical support
- Free "business success" resources
- Product updates, including tax tables, provided with annual support contract
- Our nationwide network of Certified Intuit Master Builder ProAdvisors, offering onsite implementation, data conversion, product training, and business consulting services.

## Intuit: A Company You Know and Trust

A strong, stable, and growing company with a proven, long-term commitment to its customers and the construction industry. Intuit Inc., makers of QuickBooks® and TurboTax® and a leading provider of business and financial management software solutions, is dedicated to your business success. Your investment in Intuit products is a good one.

Features		Benefits
ESTIMATING	Estimating*	One of the easiest to use assembly-based estimating systems available. Create fast, accurate plan takeoffs—with full material, labor, equipment, and subcontract details—for every part of a project.
	Proposals	Automatically export your takeoff or budget; then use the built-in custom document formats to produce a professional and complete proposal.
	Client Tracking	Manage sales leads from first contact to signed contract. Assign salespersons, keep notes, and use the lead source list and client reports to track the effectiveness of advertising and other promotions.
PRODUCTION	Budgets	Verify job costs as you enter them. Budget integrates with Work in Progress, bonding, job status, and several reports that facilitate cost comparisons.
	Job Cost	Post current job costs from General Ledger, Accounts Payable, Accounts Receivable, Payroll, Equipment, Inventory, and a stand-alone Job Cost entry window. Use the built-in reports or create your own.
	Scheduling	Allocate resources and schedule updates quickly and efficiently with the Scheduling feature's easy-to-use Critical Path Management (CPM) tool.
	Purchase Orders	Generate purchase orders from your completed estimates. Get the right materials to the right job at the right time thanks to integration with Scheduling. Simplify accounts payable and avoid overpayments.
	Change Orders	Update your contract, budget, and subcontracts in just one step. Because you can approve each part of the change independently, you can still negotiate subcontracts after approval of the prime contract.
	Document Control*	Don't lose track of important documents. Gain easy access to correspondence and accurate project plans, hot lists, punch-list items, and daily field reports.
ACCOUNTING	General Ledger	The backbone of the accounting system. Draws information from Accounts Receivable, Accounts Payable, Payroll, Inventory, Service Receivables, and all other accounting functions.
	Accounts Receivable	Use as a marketing, sales contact, and document management tool, as well as for managing receivable accounts.
	Billing: Progress Billing	Calculate percentage-of-completion line item billing and print on the AIA G702 and G703 forms—or create your own customized billing.
	Billing: Time and Materials	Use accrued job costs for a project as the basis for billing. Meet unique time and materials billing requirements with flexible markups. A must for contractors who perform time and materials work.
	Accounts Payable	Fully integrated with Purchase Orders, Subcontracts, Job Cost, and Inventory. Enter a purchase order number to complete your entire invoice entry in one step. Compares invoices to purchase orders, preventing over-pricing or over-delivery.
	Payroll	Manage payments for prevailing wage, union benefits, qualified benefit plan, and more. All payroll is calculated automatically.
	Service Receivables*	Automate service contracts, routes, dispatching, on-call work orders, quotes, and point-of-sale and billing-of-service work and materials.
	Inventory*	Manage your complete inventory. Fully integrates with Estimating, Purchase Orders, Accounts Payable, Job Cost, and Service Receivables.
ANALYSIS	Financial Review	Easily generate graphs of trends and ratios to identify and analyze your company's finances.
	Reporting	Choose from more than 1,000 professionally designed reports with easy-to-enter selection criteria. Or let Report Writer help you create your own.
	Job Cost Analysis	Easily research expenses using job costs that are maintained in full detail throughout the entire project. Take advantage of job costs when reporting labor hours and equipment time.

\*Add-on Module

## Right for You

### Choose a Master Builder Solution If Your Business:

- ✓ Can't gauge crew productivity because of inaccurate or incomplete job-cost reporting.
- ✓ Needs better job cost reports.
- ✓ Doesn't efficiently track and schedule employees dispatched for service work.
- ✓ Needs construction-specific payroll.
- ✓ Gets caught short of needed materials at critical times.
- ✓ Has trouble managing purchasing and inventory.
- ✓ Takes too long to generate detailed estimates and proposals.
- ✓ Can't easily track money owed by contractor per job.
- ✓ Would benefit from integrating service, inventory, and new construction functions.
